TITLE : ANALGESIC FOOD

ABSTRACT : PURPOSE: To provide an analgesic food by using powder of pear fruit and/or powder of pear fruit juice as essential component.

CONSTITUTION: The fruit of gear (an arborescent deciduous tree of Rosaceae family) is subjected to the pretreatment such as washing, removal of foreign material such as dust, etc. The fruit is then crushed together with 5~10 times volume of water optionally after skinning. As an alternative method, the fruit is cut to small pieces without adding water, freeze-dried, and pulverized. The freeze-dried powder is used as an essential component of the objective analgesic food. In the case of crushing the fruit with water without skinning, the crushed product is filtered to remove the coarse pieces of the skin. The analgesic food may be a cake, refreshing drink, candy, powder, granule, etc. It is administered at a dose of 50~300mg/kg daily.

EFFECT: An analgesic food absolutely free from side effects, and having remarkable remedying effect against the gain of throat in bronchial asthma, etc.
